

Not everyone needs a new Disa* and the reason why

C.A. PICARD now offers an alternative in upgrading your Disamatic* Foundry operation. We supply complete refurbished and upgraded mold lines for a fraction of the cost of new. Our "NXT Control Management" upgrades your machine to be equal in ease and diagnostics to all new Disamatics*. You will achieve :

- Increased production with major decreases in "downtime".
- Automatic settings with a "Pattern Recipe" during job change
- Recorded operational efficiency for all shifts.

We offer these two excellent values :

Disamatic* 2013 Mk-5/A with :

- * Chamber size of 600x480mm
- * State-of-the-art "NXT Control Upgrade"
- * Complete refurbishment with all new wear parts & seals
- * Optimized hydraulics

..... Call for price

Disamatic* 2013 Mk-5/B with :

- * Chamber size of 650x535 mm
- * State-of-the-art "NXT Control Upgrade"
- * Complete refurbishment with all new wear parts & seals
- * Optimized hydraulics

..... Call for price

Available Options for Above Machines:

- Complete hydraulic or pneumatic mold conveyor (AMC)
- Complete synchronized belt conveyor (SBC) of any length
- Complete dome valve assembly for sand system
- Coresetter, left or right side
- Quick Pattern Changer (QPC)

Other Products :

- Machine Trade-In Program
- Complete "Turn-key" Mold Lines
- Chamber Expansion - Convert "A" size to "B" size
- Machine "Excell" Program by Dual Hydraulics
